The best-laid plans are generally put together by a professional, so do the same for your IT Infrastructure and save loads!

Have you thought about the risks surrounding not implementing a sound IT infrastructure?

### What Are The Risks To My Business?

- ✓ IT resources may lack experience for the design
- ✓ Designs may not be future-proof
- ✓ Time is wasted acquiring knowledge for design that becomes obsolete
- ✓ Inexperience in the technology with high risk of failure
- ✓ Best practices are not known or followed
- ✓ Business cases are not well defined with no clear return on investment
- ✓ Licensing and hardware may be over specification, resulting in wasted funds

### How Can Evolv Help?

By providing infrastructure design and deployment services to your IT team, you can:

- ✓ Ensure that IT resources are backed up by experience
- ✓ Make sure that designs take into account your business strategy and plans
- ✓ Acquire knowledge rapidly with no wasted energy
- ✓ Avoid risk of design failure
- ✓ Rest assured best practices are backed up by support from vendor
- ✓ See that business cases drives the design and return on investment
- ✓ Avoid licensing/hardware issues by having attention to detail applied

Give your IT resources the assistance they need for a successful deployment without the risks
