EVOLV NETWORKS
Innovative Technology Evolution

Get a FREE consultation - how we can assist your business with connectivity and best practice.

Inter-Branch Connectivity

Connecting your stores/branches is vital to your business growth. Using the right technology partner is even more important. Let us guide you to avoid the pitfalls.

WHAT ARE THE RISKS TO MY BUSINESS?

- Connectivity is often built on ADSL only.
- Performance can be erratic at the best of times.
- No future proofing in terms of where servers are hosted.
- Provider outages can cripple your business.
- Poor footprint for fibre or microwave, which limits your options.
- No backup connectivity is provided.
- No graphing of traffic to see high/low usage.

How Will These Risks Affect My Business?

- ADSL has no Service Level Agreement and 0.348Mbps guarantee.
- Erratic performance leads to unproductive staff and poor service.
- Design doesn't accommodate your future growth plans, leading to wasted funds, redesigns and downtime.
- Provider network outages can result in lost orders and unproductive staff.
- Branches are offline when their inter-branch is offline.
- No traffic data results in no capacity planning.

How can Evolv help?

Have a robust solution that is stable and has failsafe in place

Accommodate your plans for future growth

Protect against outages and the effect on your business

Plan for capacity changes in advance

EMAIL SERVICES PROVIDED

SIZING OF CONNECTIVITY
OUTAGE IMPACT
ASSESSMENTS
COVERAGE CHECKS
