Bring Your Own Device (BYOD) is a blessing for employers, but it can also be a curse. With a sharp increase in mobile device hacks, you can ill afford to ignore the risks to your business

### What Is The Risk To My Business?

- ✓ Threats are brought in to your network using staff's personal mobile devices
- ✓ Root and security hacked devices are prime candidates for infection
- ✓ Files are directly accessible over the wifi network
- ✓ Information is stolen or encrypted for ransom
- ✓ Staff are able to copy data to their mobile phones
- ✓ Company email and files are stolen with the personal device

### How will my Business Be Affected?

- ✓ Directors can be held personally responsible negligence
- ✓ Businesses grind to a halt, due to infections and leaked information
- ✓ Sensitive documentation is stolen by staff by copying onto their phone, and then leaving with it
- ✓ Confidential emails and files can be leaked from stolen devices

### How Can Evolv Help?

- ✓ Segregate mobile devices to protect network
- ✓ Management software can detect rooted and security hacked devices for corrective action
- ✓ Restrict access to file and sensitive data
- ✓ Block the transfer of files to mobile devices
- ✓ Apply mobile policies which encrypt company email and files, so they are useless after theft

Personal devices can wreak havoc on your business. Don't allow staff to open up portholes of attack.
